

TRAILER LIFE 2016 GUIDE TO TOW RATINGS

by Chris Hemer

WORTH THE WEIGHT

Knowing how much your vehicle can tow will help you make an informed decision on your next purchase

Whether choosing a travel trailer or a fifth-wheel for your RVing lifestyle, the first place to start should be the vehicle you plan to tow it with. If you own a truck or SUV, you probably already know its tow rating, but if you're buying an all-new tow rig and trailer, the tow vehicle will dictate how much trailer you'll be able to pull safely.

Every year, vehicle manufacturers publish tow ratings for their vehicles. These ratings are based on a variety of factors, including engine, transmission type and final drive ratio. When choosing a new tow vehicle, it is very important to make sure the vehicle you're purchasing is properly equipped. To tow the weight of your trailer, some models may require a towing package (sometimes dealer-installed), a higher gross vehicle weight rating (GVWR) or a cooling package.

There are other things to consider as well. Make sure the tow vehicle is equipped with tires that are properly rated for the load you plan to pull; some newer trucks are equipped with passenger-car tires that, while providing a smoother ride when driving solo, aren't up to the task of a loaded trailer's hitch weight. Speaking of which, you should also be sure that the tow vehicle's hitch receiver is properly rated, and that the gross axle weight rating (GAWR) is sufficient. This last point is particularly important when towing a fifth-wheel or hauling a camper.

This towing guide lists all 2016 vehicles rated to tow 2,000 pounds or more. We've incorporated a "Key to Charts" (page 83) that will help you see how the vehicle is equipped in order to arrive at each rating. Be safe, and happy shopping!

KNOW WHAT TO TOW

The 2016 GMC Yukon Denali (left) is rated to tow up to 8,400 pounds, while the Ford Transit Connect (top) can pull up to 2,000 pounds.

EXHAUST BRAKES & TAP SHIFTER

FORD 6.4L & 6.7L & 6.0L

New In-dash 'Push To Engage' Button!
*Ford 6.7L Only

Turbochargers on current model engines utilize variable exhaust vanes to improve turbo response. We program the vanes to close off the exhaust when decelerating which creates over 110 retarding HP. When applied, the transmission is down shifted, keeping engine rpm and engine retarding force high, helping to slow the truck down.

- Now access all 5 gears with a tap of your finger
- Control lock-up clutch for towing and dyno testing
- Overdrive control for slower driving in town
- Works great with engine exhaust brakes like BD's VVB

KEEP YOUR FAMILY SAFE WITH ATWOOD DETECTORS

NON-DIGITAL DISPLAY ALSO AVAILABLE

CO GAS ALARMS

Protect your family from carbon monoxide. Less sensitive to humidity and "false" gases than other brands. Loud alarm, digital display and patented fuel cell technology utilizes a more accurate sensor. Approved for ceiling mount. Includes three AA batteries. Industry leading 10 year life cycle. Available in Black or White.

DUAL LP/CO ALARMS

Single unit detects both LP and CO gases! Uses chassis and battery power to help protect your family. Operates in six separate modes. ETL listed and tested to UL 2034, UL 1481 and CSA 6.19.00 for RV Applications. Available in Black or White.

LP GAS DETECTORS

Designed for tough RV environments, alerts you to low concentrations of LP gas through red and green LEDs. If gas exceeds 2,000 ppm, a loud piercing alarm will sound. CSA listed. Adapter mount ring fits the 3/8" x 3/8" cutout from earlier flush mount detectors. Available in Black or White.
